Ottawa, ON

Education

Masters of Applied Science in Human-Computer Interaction

Carleton University | September 2017 - May 2019

- Relevant Coursework: Design Research Methods, Fundamentals of HCI Design and Evaluation, Experimental Methods and Statistics.
- CGPA 11.4/12

Bachelor in Architecture

Birla Institute of Technology | 2007 - 2012

Experience

Research Assistant

Carleton University | May 2017 - May 2019

- Conducted an ideation session with 8 designers to identify opportunity areas in the design space of shape-changing devices.
- Conducted interviews and co-design sessions with 11 people with repetitive strain injury to identify deep-rooted needs to inform the design of shape-changing break reminders.
- Conducted qualitative analysis to formulate insights and suggestions to design an effective shape-changing break reminder.

UX Researcher

Canada Science and Technology Museum | Jan 2018 - Sept 2018

- Conducted observation with 6 visitors with autism at the museum to identify different barriers to an ideal museum experience.
- Conducted post-visit user interviews with people with autism, their families, and caregivers to get additional insights into their experience at the museum.
- Conducted qualitative analysis to formulate suggestions to support key stakeholders at the museum to improve the accessibility for people with autism.

UX Designer

Songdew Media Pvt. Ltd. | May 2017 - August 2017

- Led the Redesign of the homepage and conceptualized features to address the needs of listeners, artists, and the internal teams.
- Defined the 6-month product roadmap to align the development, brand alliances, and music release team and provide a guiding document for all internal stakeholders.
- Conducted an in-depth evaluation and usability tests to identify and redesign elements on the website with usability issues.
